PWA APPROVES WATER CONTRACT

Authority from the PWA was received last week by the village officials to award the contract for water supply extensions in Lansing to the George D. Hardin Co., of Chicago. The bid of this company was \$39,739.40.

The project includes connection of the Lansing and the Hammond, Ind., water systems, construction of a 500,000 gallon concrete storage reservoir, and a pumping station. PWA made a grant of \$17,571 to the project, the total estimated cost of which is to be \$48,571.

PWA offices the work will require 18 weeks to complete and will employ a daily average of 53 men.

A bond issue has been floated by at 8 o'clock. the village in the amount of \$75,-000 to cover the cost of constructien of this new extension to the water system by which the village will receive filtered water from the city of Hammond, and at the same time retire outstanding indebtedness against the present water system.

Of the bond issue, approximately \$47,000 will be used for the ac tual construction of the 500,000 gallon water reservoir, pumping station, laying of additional water mains, part of which is to be laid in the city of Hammond,

The remaining \$28,000 of the bond issue will be used to retire outstanding water certificates on the present system.

Approval of this contract by the PWA will launch the second work project within the village in recent weeks, and supply a keen need for employment. Village specifications on the contracts call for the use of local labor whenever and whereever possible-

Work certificates are being issued to local residents at the village hall. We are informed that the certificates must be presented to the foreman on the jobs before the applicant for work will be given consideration.

VILLAGE FACES

Lansing, already the most sued village of the south surburban district, was faced with a new suit, when it was served with subpoena, it will be connected with the villast week, to appear in court within twenty days to answer to the complaint of the Cedar Rapids Life Insurance company.

No information was available at the village hall as to the actual nature of the suit and the attorney, O. I. Lewis, who is to investigate the claim and prepare the village defense, was out of town and could not be questioned.

Rumor has it that the new claim is a financial one, running in rather large figures but there was no verification of this rumor.

made boots for Ralph W. Emerson were accompanied by Messrs. 86 is still making shoes to order.

TO SING CANTATA NEW YEAR'S EVENING

A cantata. "The Message of the According to a notice from the Star" is to be rendered by the Choral Society of the Munster Christian Reformed church in the church edifice New Year's evening

> This cantata is being diffected by Mark S. Hallett and will feature the following soloists: Mrs. Carl Lightle, soprano; Mrs. Lawrence Boender, contralto; Peter Vander Vaart, baritone, and Rueben Bergstrom, tenor.

> Mr. Bergstrom is the tenor solo-Singers Anne Gordon will be the pianist.

An invitation has been exteded to the public to hear this concert.

FRIDAY

Notices calling for bids on material for the laying of 12 inch iron water pipe line as well as fittings etc., have been published by the village trustees and the bids are to be in and ready for reading Friday evening when a special meeting of the dads is to be held at the village hall.

This letting of contract for the material for the construction of the water line through the city of Hammond to convey water from that city's new filtration plant to Lansing is the final steps necessary to get the project under way-

Labor for laying this pipe line COURT ACTION is being supplied by the WPA, being granted as a Hammond project. There is to be approximately 5400 lineal feet of 12 inch pipe laid in 173rd street, Hammond, from Calumet avenue to the state line where lage system.

Estimates on the cost of this mathe bids are within this amount and are from responsible concerns the contract will no doubt be given at once and the work on the line will get under way.

TEMPERANCE IN THE AIR

There's temperance in the airliterally and figuratively. After a nation-wide poll of passengers on the question of serving liquor on its planes, the American Airlines, Inc., decided not to do so.

"Public opinion is against the practice. . . The vote was overwhelmingly negative," the company announced. Travelers were realistic when they faced the concrete question of adding alcohol to the hazards of air travel, or of subjecting non-drinkers on planes to the offense of drinking passengers.

There's temperance in the air in another sense, too, Organizations which fought for prohibition have already seen enough broken promises of the liquor interests since repeal to stir them to action again. The salcon, supposedly outlawed, is back in disguise; it's a restaurant now. In place of the old-time free lunch is a meal to be paid for; it is served in a bar-room-

The increase in drinking, particularly so-called social drinking among young people, stimulated by alluring and extravagant advertising, is causing danger signals to be hoisted.

There are many other straws in the wind which show how empty were the promises of liquor purvey. ors that if prohibition were repealed we would enter an era of moderation and respect for law in which all the old evils of the use of and traffic in liquor would vanish. Yet Uncle Sam is busy today chasing

bootleggers. Liquor has always existed or thrived on deceit and delusion. It only its real nature and results could be seen clearly in their naked reality by enough people, "control" or prohibition would take

care of itself. No, repeal has not brought the promised millennium of moderation and temperance. On the contrary old excesses and evils have returned. Personal self-control, public education, common sense, and a refusal to be fooled by the snares and delusions of alcohol will eventually bring temperance. It's in the air already.

CAUGHT IN THE WILD

Ames Bennet Copyright by Robert Ames Bennet

CHAPTER I

The Chechahcos.

The Chechahoca.

—1—

GARTH knelt upon the planks of the small floating wharf to fasten a pitch-smeared patch on the bottom of his upturned birchbark cance. In the milds of his work he paused to listen. A faraway drone was just audible above the ting and hum of insects. He turned to peer at the southerly sky above the vast flood of the Mackenzie. The drone became more distinct.

A plane was coming down river towards the emergency refueling station at the old abandoned trading post. Yet the regular schedule of the line did not call for the northbound Beilanca for several days. In all probability, the Commercial Airways had sent out its emergency plane from Fort McMurray, Alberta.

Though his thoughts lingered on

Though his thoughts lingered on Though his thoughts lingered on the approaching plane, his eyes and hands turned to the patching of the cance. The craft must be made ready for the weeks of upriver paduling. There would be none too much time for the thousand-mile trip out before the winter freeze-

As he finished the patch the loud drone of the motor swelled into a staccato roar. He turned to watch the white monoplane swoop down and take the water like a squatter-

ing duck.

The pilot started to taxi shoreward. Garth again set about patching the small leak. A sudden slence told that the motor had been stilled. Across the hush came a curt

"Ho, Jack, fend off and snub her." Garth leisurely twisted around to Garth leisurely twisted around to eye the incoming craft. She was a beautiful medium-sized plane with a cabin behind the semi-enclosed cockpit. Between her headway and the river current she was driving toward the upstream side of the wharf at a speed that promised to smash the pontoons.

Yet neither of the two helmeted persons in the cockpit made a move to climb down in readiness to ward off the shock. Nor did either work the controls to veer the craft clear. Both were hastily putting on head-

the controls to were the craft clear. Both were hastily putting on beadness and gloves to protect themselves from the outbuzzing swarms of mosquitoes and buildog files. They seemed to take for granted that the worker on the wharf would rush to give them service.

In the North ablebodied men are

supposed to walt upon themselves.
More, the pilot's tone had been that of a master commanding an in-ferior. Garth stayed motionless, waiting for the crackup with cool

ferior. Garth stayed motioniess, waiting for the crackup with col curlosity.

At that the smaller person cried out in a sharp, almost shrill voice:

"Quick, you gawping dummy!"

The fact that one of the pair was a woman made a vast difference. Garth caught the end of the mooring line flung by the pilot.

Aided by a slight swerve in the current, he was able to walk the plane to the outer end of the wharf before the nearer pontoon could hit the float logs. As the aircraft glided clear, he made the line fast to a ringbolt and returned to his canne.

"What the devil!" snapped the pilot. Come back, you fool. Take in the slack—moor us."

Garth swung his canne into the water and stepped aboard to test the last patch. The airplane, having drifted downstream to the end of the line, swung around and lay nosing the current. Neither the man or the woman made a movemen until Garth drove his canne ashore and lifted it atop the bank. As he climbed to the front of the old post store, above the base of the wharf, he saw the pilot at last swing down to haul on the line. Inside the big log cabin he crossed to one of the rear rooms and put

a light hand on the forehead of the snoring man in the nearest

Turn out, Tobin. Visitors.

"Turn out, Tobin, Visitors."
The grizzle-bearded station tender roused up to blink and peer,
"Vis'tors? You're not stringin' me, Mr. Garth?"
"No. Rover plane."
Tobin slipped on his moccasins and hobiled out into the storeroom. The pilot had moored his plane head and tall to the lower side of the landing stare. He was handthe landing stage. He was hand-ing his woman companion down from the cockpit,

They went in under the overhanging wing to the screened door of the cabin. It opened to the outhrust of a portly man in city clothes. Assisted by the pilot, he managed to get down upon the wharf by means of steps lowered from inside the cabin. After hurriedly putting on a headnet and gloves, he started inshore between his two companions.

Garth spoke to the supply tender: 'Tm only a stray prospector, Tobin.

Garth spoke to the supply tender;
"I'm only a stray prospector, Tobla.
Understand?"
"Aye, sir," grunted Tobla. Without a word of greeting, he hobbled
back a few steps as the pilot and
his passengers stepped in over the
rough threshold.

The portly man opened a goldmounted claar case. The young
woman produced a long amberstemmed cigarette holder. This was
roomatly filled by the pilot, who

promptly filled by the pilot, who paused only to slap a mosquito on his clean-shaven cheek before striking a match.

Out went Garth's hand in a swift

clutch that caught the flaming match in his calloused paim. The pilot, who was as tall as Garth and heavier built, turned to stare down

at him in cold anger,
"You insolent roughneck! Clear
out of here."

Garth smiled. Tobin did the answering. "Huh, crazy loon—lighting matches in here. Can't you read the sign? 'No smoking.' Bounce him, lad."

The pilot thrust a hand inside his leather jacket. "Try it. I'll drill both of you." both of you.

"How frightful," said Garth. "You must imagine this is a Wild West show. Please don't shoot until the lady can get outside. Shots are lady can get outside. Shots are even more apt than matches to ex-plode all this gasoline."

The portly man snapped shut his

"That's so! You have no cause to be ruffled, Vivian. The fellow seems to have acted on a well-in-tended impulse."

The pilot's hand came out empty from inside the jacket, "Why couldn't the infernal fool have

spoken a warning to me?"

Garth had sized up the man. He expected neither an apology for the abuse nor thanks for saving the visitors from possible annihilation. With an indifferent smile, he shifted the gaze of his gray eyes to examine the woman member of the party.

A first glance had led him to think her older than the pilot. Under her rouge and powder her face was thin and drawn. Its lines might have belonged to a woman in the mid-thirties. Her blue eyes looked more than bored and cynical. Their tiredness matched the lined face. Her body was thin almost to boniness.

Yet, upon examination, Garth saw she could not be even in the mid-twenties. Traces of girlish freshness still lingered in her paint-el face, under the blemishes of dis-sipation and distillusionment.

As she faced away from him, the pilot spoke to Tobin: "Get busy. Truck down sixty gal-

ions of gas and five of oil—and be quick about it. While your helper is refueling the plane, you'll cook us the best meal you can throw to-

Down came Tobin's shaggy eye-brows. "Who d'you think you're bossin'? Shove along to a tradin' post for yer grub an' gas. This here cache is the comp'ny's emergency deepo."

The portly visitor took a billfold from his coat and drew out a paper.
"Take a look at this order, my man.
It authorizes me to requisition any of the Airways' stations for what-ever supplies I wish."

Tobin read the order, and thrust Tobin read the order, and thrust it back, with no lessening of his dourness. "So you're Burton Ramill, are you'? Looks like a straight order. All the same, you'll sign the book before you'll get a drop." He turned about to open an oily account book on one of the stacks of gasoline cases. Mr. Ramill drew a fountain pen from his vest pocket with nium white fingers, and

a fountain pen from his vest pocket with plump white fingers, and limped forward to write. "There's your recelpt," said the pilot. "Now have this dumb helper of yours rush out our gas, and get your pans on the fire. We want

"Yuh? Well, you're welcome "Ynh? Well, you're welcome to want it till doomsday. That comp'ny order calls for supplies. Don't say nothin' about cookin' nor service." Mr. Ramill interposed: "All right, man. I see you're sitff from rheumatism. I will pay this young fellow to refuel the plane."

Garth turned his cool gaze upon the pilot. "Why not give this bird of yours the chance to earn a little more pay?"

more pay?"
"Because Mr. Huxby has flown

my plane all the way from Chicago, with only short stop-overs. Also, he is my partner, not a mechanic."
"Well, he's not the only party present who's not a kiw!." Garth pulled a small poke from inside his buckskin shirt, hefted it as if considering, and put it back. "Nor do I need your pay."
Huxby's supercillous eves elis-

Huxby's supercilious eyes glis-tened with sudden keen interest. "What's that? You're from the new gold fields?

"No."
"But your gold sack?"
"Gold?" Garth muttered.
He drew out his poke again and opened it to shake a few small nodules of metal into his palm. Both Huxby and Mr. Ramill stepped close to peer at the grayish silvery bits. The older man looked puzded. The younger took a nodule into his own palm.
"Galena. I'm a mining engineer. You're out of luck, not making a gold strike. Never before in history has silver been so low."

has silver been so low."

Garth looked disappointed. "Too bad, isn't it?"

bad, isn't it?"

He picked out a nodule that had been rubbed to a rather bright polish. The girl was leaning with her left hand on one of the lower piles of gasoline cases. A ring with a large blue diamond banded the "engagement" finger. Garth thrust the nodule up close beside the ring.

"Yes," he said, "I always did think gold looked prettier than ga-lena—even white gold." The girl drew her hand away as if he had smirched it. "My ring is not gold. You pretend to be a prospector, yet you do not know plat-inum from gold!"
"Platinum?" Garth questioned.

"But your friend here calls it ga-

Mr. Ramill interposed: me, Lilith-Young man, I am largeif interested in metalliferous mines. If you have located a lode of galena, the lead might pay for development of the prospect."
"That depends," put in Huxby. "Where's the place?"

"Where's the place?"
"Three weeks—paddle and portage," Garth answered,
"Slow travel. But by airplane?"
"The bird distance can't interest
you. Neither lead nor silver would pay for airplane freighting.

As Garth spoke he put up a hand to cover a yawn. "If you don't mind, Tobin, I'll roll in. It's a long travols to Great Slave."

The portly investor in mines caught the eye of his engineer partner. He spoke to Garth: "You are going outside?"
"Perhaps."

"Well, a day or so should make no difference to you. Is there a lake or pond near your prospect?" "One about four miles long; half as wide."

Huxby repeated his question: "It could be reached how soon by air?"
The fish were no longer nibbling;
they were hooked.

they were hooked. Neither Mr. Ramill nor Huxby

looked like a crook. They had the appearance of reputable business men. On the other hand, neither looked easy. Hurby broke in on Garth's weighing of the chances; "Well, Jack, let's have it."

"Two or three hours," Garth replied. "I don't know the speed of your plane."

"Fastest type of cabin cruiser, call it six hours to go and return, and the same to inspect your prospect. It's possible there may be a trace of gold in your ore. I'll test it while you get your sieep."

The girl spoke to Mr. Ramill: "I shall take a nap myself, Dad. Ten hours of nying, with no chance to dance off the Scotch, is enough to kill a horse."

In the act of handing a nodule to thirth Carth prosped to street.

kill a horse."

In the act of handing a notule to Huxby Garth paused to stare at the girl. So that was the answer—liquor, tobacco, paint, and all the rest of the flapper-jazz rot.

She stiffened and stared back at him haughtily. He dropped the nodule into Huxby's cupped paim and crossed into the rear room to stretch out on one of the bunks.

tug at his shoulder roused Garth from his six-hour sleep. To-bin's hoarse voice croaked in his

ear:
"Roll out, sir. Sun's up. The
pair of 'em are keen to be a-wing.

The Girl Drew Her Hand Away as If He Had Smirched It.

Looks like their tests of your nug-

Looks like their tests of your nug-get 'livened 'em up. Grub's on."
Garth pulled on his buckskins and moccasins and stepped into the storeroom. Miss Ramill was com-ing in at the front door. Sh paused to remove her headnet. Huy-by and Mr. Ramill were already by and Mr. Ramili were account putting down a hearty breakfast of bacon, sourdough bread and oat-

The girl stopped in the entrance to peer around the cubbyhole kitchen, her scarlet-smeared lips curied with disgust. Though soap-clean, everything in the place ooked

Huxby sprang up to place the chair at the near end of the table. "Pardon our not waiting, Lilith," he apologized. "I did not wish to waken you with the refueling. Planned to do it while you break-

"Quite thoughtful of you, darling.
But you need not think I'll drink
this lye or eat any of these beastly
messes. Not for me. You can have your steerage garbage, I'll keep to cabin fare."

She faced about and went back through the passage. Huxby stood hesitating. Mr. Ramill motioned hesitating. Mr. him to sit down,

"You stocked the cabin with enough wines and delicatessen to last several days. Finish your meal."

at Garth, "I've had enough eats to founder a Scotch cow. May as well see to the refueling."

WHIMS OF FASHION

Just as the renaissance influences the colors, so does it the fabrics.

The military note creeps into fashions whether or not we believe in wars.

A growing number of women like casual tweed coats for everyday wear, and with this type of coat one may wear scarfs for several sorts.

Schlaparelli offers a new sensation-a dance dress with pantalettes, belt with padlock.

Ermine-trimmed woolen or velvet suits are reported selling well in many sections of the country.

Pleats are important part of the fashion picture and occur in daytime, dinner and evening fashions.

Watch the hood as the newest silhouette influence. Presented first in furs, it is now used in fabrics for sport.

Fur hats are keyed to many custume fashions. They may be trimmed with flowers, bird wings or ribbon bows.

two-to-ten-year olds need the extra No Need to Suffer "Morning Sickness"

"Morning sickness" - is caused by an acid condition. To avoid it, acid must be offset by alkalis - such as magnesia.

Why Physicians Recommend Milnesia Wafers

These mint-flavored, candy-like wafers are pure milk of magnesia in solid formthe most pleasant way to take it. Each wafer is approximately equal to a full adult dose of liquid milk of magnesia. Chewed thoroughly, then swallowed, they correct acidity in the mouth and throughout the digestive system and insure quick, complete elimination of the waste matters that cause gas, headaches, bloated feelings and a dozen other discomforts.

Milnesia Wafers come in bottles of 20 and 48, at 35c and 60c respectively, and in convenient tins for your handbag containing 12 at 20c. Each wafer is approximately one adult dose of milk of magnesia. All good drug stores sell and recommend them.

Start using these delicious, effective anti-acid, gently laxative wafers today

Professional samples sent free to registered physicians or dentists if request is made on professional letterhead. Select Products, Inc., 4402 23rd St., Long Island City, N. Y.

CTAR DUST MOVIE AND RADIO

By VIRGINIA VALE

BUCK JONES had a grand reunion with his wife and New York from a round-theworld trip. Noah Beery, Jr., joined in; he made the trip east with Buck for the best of reasons-he and Buck's daughter, Maxine, are engaged, you know.

Another man who'd like to have a reunion with his daughter is Pat
O'Brien, who made the trip east for business reasons;

welcome, with newspaper photographers and reporters and all the
trimmings, but he didn't want to
talk about himself. His wife and
daughter are his favorite topics of
conversation. Or he'll talk about
James Cagney—what a swell guy
Cagney is, and how much he likes
to work with him. They've just finished "Celling Zero" together. But
O'Brien's pet picture, of those he's
made, is "Oll for the Lamps of
China."

Mary Rogers, daughter of the be-leved Will, will probably be heard on the air in "Miss Pinkerton," by Mary Roberts Rinehart. A stage career is what she really wants just now, and as she's pretty and talented she'll probably make a success of it.

Quotation from Charlie Chaplin:
"I got most of the things I want,
but I found out after I got them
that I should never have wanted
them in the first place." But it's
so much easier to feel that way
about a thing after you have it!

Mrs. Fred Astaire rather hated Mrs. Fred Astaire rather nated the thought of settling down on the Coast, just at first—yet Fred couldn't very well make pictures for IKO anywhere else. You can't blame her—all her friends were in the East, and being a Hollywood wife isn't much fun. But she likes it better now—so California has converted one more easterner.

"Mutiny on the Bounty" knocked "Matiny on the Bounty" knocked over a lot of records recently; during its fourth week at the Capitol theater, in New York, there were still people standing in line for tickets. A swell picture—but I warn you girls that, if you don't like brutality, you're going to close your eyes through a good part et it.

Joan Blondell took off 15 pounds in one month—there's a reducing record for you!

-Yes, but it's too late to get

RKO is taking bows on the first Lily Pons picture, "I Dream Too Much"—and a grand picture it is. It would be notable, if only for showing an opera star who is young and pretty and has a lovely figure—the kind of opera star you're likely to see in the movies but not in real life, also! Miss Pons, Grace Moore and Gladys Swarthout are making it pretty hard for the old-fashloned singers who are everything in sight and then claimed that they had to do it because they needed strength in order to sing. in order to sing.

It used to be fairly easy for a movie star (or near-star) to get an honorary fire badge. Then some of them went in for red lights and sirens on their cars—and now nobody can have an honorary fire badge any more!

Sally Eliers and Jimmy Dunn are going to work together again; they'll do "Tomorrow Is the Better Day" (and that title's so long that it probably will be changed), and try to make it as successful as "Bad Girl."

It's rather a shock, after being told for years that Jean Harlow's

There's a new kind of amateur hour on the air, every Tuesday night at 0:30 on WMCA. The amateurs are society folk and once they get started singing, reciting, or what-not, they go right on to the end—this being the only amateur hour that has no gone. hour that has no gong.

ODDS AND ENDS . . . James Cagney's contract has six months to run, but even note Warner Brothers are talking to him about a new one . . . Kay Francis got hers three months early . . . 'I'n Old Kentucky,' Will Rogers' last picture, is his best one . . The Polynesian girl two plays opposite Clark Cable in "Mutiny on the Bounty" is studying law at the University of Southern California . . . Charles Boyer will make on of those French Poreign Legion pictures . . . Since Brian Aherne did "I Live My Life" with Joan Craneford he's been besieged by autograph seekers . . Looks very much as if Sylvia Sidney and her bridegroom, who's a publisher, had parted for keeps . . . Pola Negri's still making pictures in England . . . It's being whispered about that some amateur hours are losing their drawing power, so far as the listeners are concerned; they still draw a point where feminine sales ra mateurs who women to perform!

Captain Meaghan's Goblin By LYMAN MOORE & McClure Newspaper Syndicate.

Well, it happened that Captain Meaghan's mare was lame, having cast a shoe. The captain had planned to spend Halloween with some cronies, and since the town was but ten miles off he never thought to excuse himself on account of having no horse.

It was past midnight before any one thought of bed. The captain saw several to their homes, and they in turn saw him on his way so it was after three when he final ly set out on his lonely walk,

There was a full moon and no wind. The moonlight lay on the ground like new fallen snow, and the captain wept a little to see the world so fair and peaceful.

world so fair and peacetu.

Trotting along thus, heedlessly, he presently found himself in a place he did not remember. It was a wild, ionesome spot, with rocks and thorn-bushes and dark bog-firs. The going grew more difficult, till he knew he was lost altogether.

he knew he was lost altogether.

Presently he perceived he was nearing water, for mist lay before him, threading the firs like the folds of a silver scarf. It thick ened till it rose up ahead with the moonlight shining through, the way it looked opaque and luminous—like a phantom opal.

like a phantom opal.

As he drew near the captain be held what took his breath and stiffened his limbs until they were quite steady. It was the apparition of a gigantic man, pale and swaying bolt apright in the mist. It retreated, then drew near, as it warning him against advancing—which you may be sure was not his intention!

Twas an mangementated against.

Twas an unpremeditated action that the captain clapped both hands to his head. On the tick of the instant, the figure threw up its hands. And at that the mist parted, the goblin vanished and the moon showed the hortided captain a deep, narrow chasm on the brink of which he stood. 'Twas an unpremeditated action

His limbs trembling, he made his way from the dangerous spot and thought it mere prudence to wait

revisit the spot one afternoon. The mist curtain hung above the chasm; but though the captain stared till his eyes watered and even ventured to call out politely

the goblin would say to that!

So with the moon shining full and sweetly, he rode briskly forward. There hung the opalescent curtain. He struck spurs to the mare, but she who had never disobeyed him before, refused, rearing on the brink. And there rose of a phantom rider on a huge, ghostly horse rearing and pawing above the gulf where no living horse.

Tests Show Ability.

Mechanical tests of stocktones. the gulf where no living horse could be,

With a screech to wake the dead the captain reined the mare. She wheeled as she came down. He gave her her head and she did not look behind. They reached home sweating and trembling.

This troubled the captain more than ever. A confidant he must have. He decided to take the mat ter to a fine lad of his own age with whom he had raided many an

So to Dublin fared the captain. He found his friend in angry mood, having just had to pay duty most unfairly on some French brandy

However, he was glad to see his old playfellow, and when the cap tain diffidently unburdened himself, the merchant asked a few questions and scratched his head. Then he burst into a roar of laughter.

"Danny, I might declare 'twas a miraculous vision. But I'll tell you the truth. 'Twas the full of the moon, you say, each time you saw the goblin?"

The captain assented.

Cent's Worth of Alum

WASHINGTON. - Ladies' hose and lingerie improved in appearance and made to last longer-a newly - discovered "marvelous compound tested and approved" by the national bureau of standards-only 50 cents for a package sufficient to

Doorbells are being tinkled in many cities by smooth - talking young saleswomen who have found a point where feminine sales resist-ance is just about zero, and are exploiting it for about 5,000 per cent gross profit,

They are not misrepresenting anything—much. The stuff they sell really will improve appearance and lengthen life of most knitted and lengthen life of most knifted silk goods, and it really has been tested by the national bureau of standards and the tests have been reported in a letter circular pre-pared as an answer to the many in-This tale I shall be telling you for daybreak. So with his boots to the for a pillow and wrapping himself pan Meaghan one Halloween. The capitaln was a fine lad, a great hand at sword-play and dice, a hand at sword-play and dice, a hard rider and heavy drinker, though seldom the worse for liquor.

Well, it happened that Capitaln Well, it happened that Capitaln was a fine lad, a great when the sun was up he had no difficulty in finding the road and difficulty in finding the road and received considerable newspaper reputed to be haunted.

At last he plucked up courage to that it was in these newspaper reputed to be haunted.

At last he plucked up courage to that the manufacturers discovered the "marvelous" compound. Here's the Joker.

chasm; but though the captain stared till his eyes watered and compound" is nothing but common powdered alum, and the package there before, he saw nothing.

A while later, he was riding home one night and found himself at the path leading to the haunted crag. Being full of courage he swore he'd put the mare at the chasm and leap it—and see what the goblin would say to that!

So with the moon shining full deread allow to teaspoonfuls of pow.

Mechanical tests of stocking-tops so treated at the national bureau of standards indicated increase so treated at the national bureau of standards indicated improvement in their ability to meet the pulls and stretchings of daily wear. The letter circular states: "It may tend to cement the filaments in the silk yarn together, and increase resistance to snagging of stockings made with low twist yarns. It will not prevent runs."

or refraction, of your own form and your mare's cast on the mist, which a clever scientist could ex-plain better than I. "Tis a well-known phenomenon. Moonbeams and mist, mist and That was your gobilin."

Interest part and to pay duty most unfairly on some French brandy. However, he was giad to see his bid playfellow, and when the captain diffidently unburdened himself, the merchant asked a few questions and scratched his head. Then he burst into a roar of laughter.

"Danny, I might declare twas a miraculous vision. But I'll tell you the truth. Twas the full of the moon, you say, each time you saw the goblin?"

The captain assented.

"Well, then, 'twas the reflection, leading the captain upon whom his friend's speech made a great impression, drank sparlagly.

TAUGHT TO READ

By DOUGLAS MALLOCH

THEY put it first of our three The fathers of our stripes and

stars, Yes, when they gave the land a

tool
Of liberty, the public school,
They placed it in the teacher's
hand
With this requirement, this com-

mand:
Whatever else the land may need,
The children must be taught to

But there is not a nation known To earth but may be overthrown And books, since books are made by

men,
May teach us error now and then.
For fools may write, or treason
print.
And one thing say, another hint,
And children must be taught, in-

Much more than merely how to read.

nd so I say, to those who teach

Who shape our morals and our speech,
Who would not let the children drink Polluted water, there is ink

Polluted also, there are those Who would on innocence impose— And we who would the children

lead Must teach the children what to read

Chinese Householder Can Pawn Wife in Emergency

When the Chinese householder has pawned all his household effects and still needs money, he has one resource left. He can take his wife along to "Uncle" and pawn her, declares a writer in Answers

How much he can raise in this How much he can raise in this way depends on the lady's age, looks, health, and temper. But when the bargain is struck he can go on his way, knowing that so long as he pays the interest regularly, his wife will be well fed and looked after.

The existence of a number of pawashops which specialize in wives was discovered in Tientsin as a result of two women refusing to leave the pawashop when their husbands called with the money to redeem them.

The Chinese are accustomed financial transactions of this kind. Whenever there is a famine, middle-men tour the districts which are men tour the districts which are hardest hit, buying young girls from their parents. These girls are afterwards sold as domestic servants in other parts of China. Nobody seems to see anything wrong in this, and when, some years ago, the British authorities set themselves to stamp out domes-tic slavery in Hong Kong, the re-form met with strenuous opposi-tion.

UNCONSTITUTIONAL

First Partner—Well? Second Partner—And that fellow

THE SPIRIT OF UNCERTAINTY

LEONARD A. BARRETT

A spirit of uncertainty is abroad in the land. An early manifesta-

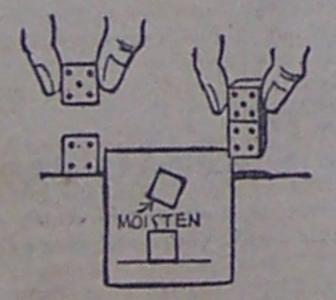

tion of this attitude was, the converting of stock securities into government bonds. Liquidity was the universal cry. People began to lose confidence in banks, to withdraw their deposits and hoard them in strong boxes. In the business world credit was difficult to pro-

cure and loans were made by banks only on the most liquid form of collateral. During the past eighteen months a remarkable change has taken place. Confidence has been restored in the banks and security values have greatly increased. This clearly indicates that we are gradually emerging into the light of better days.

However, the spirit of uncertainty has not entirely disappeared. It still stalks about like a haunting ghost, disturbing the peace and confidence of many who have devoted the larger part of their lives in diligent economic service. The man past forty-five or fifty years of age is not always sure of holding his job today. Young men are displacing older men in business and the latter having been "let out," find it almost impossible to obtain another job. The so-called "retiring age" is also gradually being lowered from seventy to sixty-five years, in some cases, particularly in the professions, to sixty years. Just at the time when experience enables a man to render his most efficient service, he is placed on the shelf. It is not surprising that this element of uncertainty has caused either a nervous breakdown or has given rise to a

MAGNETIC DICE

COME of the cleverest of impromptu tricks require a bit of "bunkum" to make them mystify, This is the case with the "Magnetic Dice." Most persons will tion, no longer exist, in practical doubt you when you tell them that fact. dice are magnetic. So you proceed to prove it.

You set one of the dice with the six side up. Taking the other, you carefully place it on the first, holding the six side down. The same surfaces must contact, you tell your friends. Sixes are the best sides to use,

Whereupon, you lift the uppermost of the dice. Invariably, the lower one comes along. There are the dice, magnetized as you prom-

ised. Sides have nothing to do with it. nor has magnetism. That is your story to cover the real secret. Simply moisten the lower side of the upper cube, Press the dice together and they will stick until you separate them.

WNU Service.

sordid form of pessimism with revolutionary dangers.

Employment insurance, old age pensions, and other solutions of the problem of uncertainty have been proposed. But all of these will ultimately fail, for they are powerless to restore confidence in one's self. The feeling of certainty is the result of confidence. When confidence in that individual security which guarantees to every person the inalienable rights of active, useful citizenship is destroyed, we again face the danger of revolution.

Now that the feeling of security in the banks and in many economic values has been restored, the next step necessary is to restore to every person a sense of confidence and security in himself.

There is innate ability the competitive economic world has never discovered. The financial and economic problems arising from the depression are being solved gradually, but no serious efforts have thus far been made to solve the "human problem." Without the solution of this human problem, there can be no complete or permanent "recovery."

The Marriage

Problem

By J. DASKAM BACON

Author of "The Madness of Philip,"

"The Inheritance," etc.

Homemaking Must Be Raised to

the Level of Other Professions

I ONG before fifty years it will, I

L am sure, have dawned upon the

average man that the chief source of

difficulty in marriage as it works out

today is not emotional, nor religious,

nor hygienic-it is purely economic.

I say the "chief source," because

no human relation is so simple as

to admit of but one difficulty or to

require but one remedy. As the

most intimate of voluntarily as-

sumed relationships, marriage will

always retain its fixed proportion

tional problems, which can never

be settled sex by sex, so to speak,

but must inevitably be adjusted

The hygienic problems, with the

contingent issue of rational birth con-

trol, can be settled no more quickly

than the steady growth of popular edu-

cation permits, and will be solved pre-

cisely as soon as would be safe, in all

probability. Judging by the growing

and intelligent interest in everything

that pertains to health and sanitation,

with special stress on vitality and lon-

gevity, I would say that this would

The religious problems, for the

Feeling, as I do, that of these

aspects of marriage the emotional

can never be settled, the hygienic

is on the way to being settled, and

the religious has been settled, I

now turn to the most Important

aspect of all for the woman of the

This situation is not at all emo-

tional and does not present the

complications of individual vaga-

ries. Though all the conditions are

ripe for adjusting it, and though

everybody's mind should be by now

prepared for it, though we are be-

ing steadily pushed to it, the pub-

lic mind is not engaged upon it as

in the hygienic field. It has not

been politely retained as a gesture

and preserved for its traditional

and sentimental uses; on the con-

Twentieth century-the economic.

great mass of Anglo-Saxon civiliza-

couple by couple.

take care of itself.

MA ED BE THE

You know you can't chop down a pole if you are going to chop at random, hittin' wherever you happen to strike. You gotta direct your shots to the same spot and the pole will fall easily, and where you want it. The same holds good with everything you do. Remember, aim at the mark, especially in advertising. In that case the mark is the people who live in the town and always want to know what their merchants have to offer.

trary, it is violently resented and increasingly questioned.

And so it is clear that I believe that nothing about us will seem more absurd than the fact that while we babbled continually about the inestimable value of a wife and homemaker, she band felt like giving her!

It would seem idiotic to her that a successful, independent wageearner should suddenly turn into a sort of ward, dependent upon whatever her guardian felt he could spare her for pocket money.

No one has ever contended that the American husband is not generous; he is probably the most generous husband on earth, man for man. But each one of the steadily increasing number of wage-earning women (and today every girl feels herself a potential wage-earner) looks with a certain uneasy wonder at a future partnership when the conscience of the junior partner or vice president or managing director or executive secretary seems likely to prick her if she lays any of unavoidable risk, unavoidable definite claim to any personal income that goes much beyond board and clothes and legitimate expenses connected with entertaining.

> The lucky wage-earner who can continue to pursue her career at home after marriage has long ago settled this question. Thoughtful women are even now considering very seriously whether some arrangement of part-time work, lightening of domestic responsibilities by various community activities, along the lines of day nurseries, food service, etc., cannot be made to give a little freedom to the wife who willingly relinquishes her old independence for family life, but who wonders if she must give up ten-tenths of it. I think we shall see this problem solved in the fairly near future.

But it may take 50 years before the great mass of women who do nothing at all but the work that all men tell them is the greatest of all, can hope to receive, as automatically as the government receives the income tax, their obvious salary: a fixed proportion of their husband's income.

Obviously, before receiving it, they must qualify for it, and this may surprise and vex a great many of them. But if they were certain of the salary you may be sure they would take a course of household economics, budgeting and child care as readily as they study stenography.

And if men want homes a hundred years from now they must raise home-making to the level of the other professions open to women.

Five Thousand Relatives

By HAL G. VERMES MeClure Newspaper Syndicate.
WNU Service.

66 A RACE track will put Spring-L' dale on the map," Roaring Reggie shouts. "Folks who follow the ponies always spend plenty coin and they might as well spend it here!"

"But I have been given to understand," Mayor Flandreau replies, "that a race track always breaks a town."

"Is Saratoga broke?" Reggle sputters. "Is Louisville or Mlami in the poorhouse? No, Mr. Flandreau, horse racing will bring Springdale millions!"

When the people of the commonwealth of Massachusetts vote in favor of horse racing, we go up there right away with the intention of building a track. But after we visit twenty towns in six months and cannot get a local license, we are absolutely disgusted. And that is why Roaring Reggie comes out of the office of the mayor of Springdale with fire in his eye,

Right after that we buy a large piece of land, put up a clubhouse along the main highway and lay out a race track behind it. When the mayor asks on opening day what we have built, Reggie tells him it is just a private residence. And he points to the sign over the was actually worth whatever her hus- main entrance which reads; "Smith way out." Family Reunion. Every Day-Rain or Shine."

"Everybody by the name of Smith can come and be entertained," Reggie explains,

"But you cannot get many people that way," says the mayor, "for after all, there are not so many Smiths."

For answer Reggle takes the mayor out to the crowded grandstand. "All of these five thousand people are Smith by name," Reggie states. "At least when the attendant at the door ask them if their name is Smith, it is a very peculiar thing but each and every one has said yes."

"Then it seems to me you are spending a lot of money just to entertain all these Smiths," says the mayor. "How can you afford to do it?"

"It so happens," Reggie replies, "that out of our generosity we let everybody purchase one share of common stock in this enterprise for only one dollar. When they leave they return the stock but somehow or other our dumb cashlers forget to give them back their dollars."

"I have been advised," the mayor | ing license?" says, "that you permit betting on

these races. That is against the law !"

"Those hides racing around the track," Reggie relates, "are not running an ordinary horse race, as perhaps you might think. This is a special psychological treatment what has been ordered for all these Smiths by the doctor in attendance, who you can meet if you insist. You see, Mr. Mayor, all the Smith family has a hereditary disease what is known as racing fever and the only thing what will cure it is watching those bangtails running around and around."

"I will have to see the district attorney about that," says the mayor. "But what about all the betting?"

"We do not allow anybody to use money; all the betting is with counters. Of course, when the people leave they can cash their winning chips at the desk, if they do not want to throw them away."

Though he insists it is all very illegal what we are doing, which is not such surprising news to us, the mayor does not really blow up until he walks into the bar in the clubhouse.

"This is criminal!" he yells. "You are serving alcoholic beverages without a license!"

"We do not need one," says Reggle, "because like I already said, this is a private home and besides we do not charge for the drinks. Though I might as well tell you before you find it out for yourself that everybody at the bar is expocted to tip the hat check girl a small matter of five bucks on the

"You must be making a lot of money," the mayor sighs.

"The parl-mutuel machines has taken in two hundred thousand bucks so far today," Reggle states. "That is, they would have if only we would let them bet with real money."

"I am afraid," the mayor repeats, "that I will have to close the place

"Out of that," Reggie continues hurriedly, "besides the regular cut for the state, we are perfectly willing to give the fair city of Springdale 5 per cent of the total take. And we are ready to pay all the taxes and et cetera if you will get us a racing permit."

"You have proved your point," the mayor finally admits with a smile. "And I will get that license for you at once, Mr. Smith."

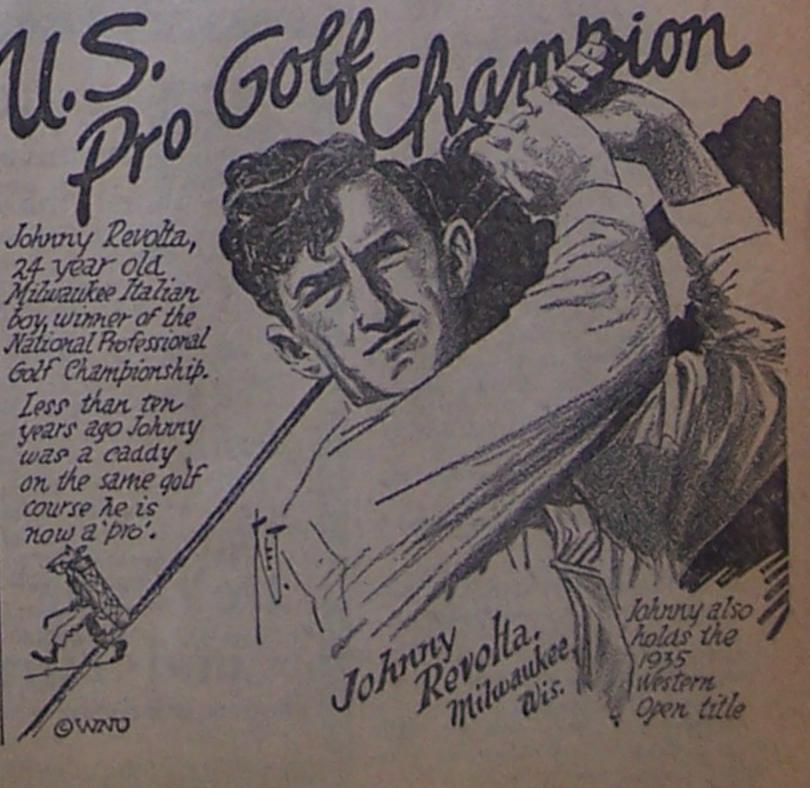

"Thanks to you," says Reggie. "But please to remember the next time we meet that my last name is Jones."

The Savour and the Light

13. Ye are the salt of the earth;
but if the salt have lost his savor,
wherewith shall it be salted? It is,
thenceforth good for nothing, but,
to be cast out, and to be trodden,
under foot of men, 14. Ye are the
light of the world. A city that is,
set on a hill cannot be hid. 15.
Neither do men light a candle, and,
but it under a bushel, but on a candiestick; and it given light unto
all that are in the house. 16. Let
your light so shine before men, that
they may see your good works,
and glorify your Father which is
in heaven.

ROOF DAMAGED BY CHIMNEY FIRE

A chimney fire that caused considerable damage to the roof of the B. Sweringa home on south Wentworth Avenue last Friday morning was said to have started from burning papers in the furnace. The local fire department had the blaze Mr. and Mrs. Peter Boer and Police of the country are staging in control within a few minutes after it arrived on the scene.

Just what caused the fire that completely disabled the model T Ford of John A. Smith Tuesday morning is not known. The machine parked in front of the post office suddenly spouted flames, Quick work on the part of the postmaster and others with hand extinguishers saved the car but only after considerable damage was done.

The flames bursting from under the hood leaped to the sun visor before they were extinguished. A bit of flying ember, when someone ripped the visor from the machine. hit Mr. Koselke just above the eye and gave him a painful burn.

The fire department was called but the flame was out before it ar-
